A SITE INSPECTION OF THIS SITE WAS MADE ON AUGUST 21, 1985 BY MYSELF AND BEET MUNGER OF THE ROCKFORD REGION OFFICE. THE PURPOSE OF THE INVESTIGATION WAS TO BECOME FAMILIAR WITH THE SITUATION TO DETERMINE THE SITE'S POTENTIAL FOR CLASSIFICATION AS AN "IMMEDIATE REMOVAL SITE".

THE SITE CONSISTED OF APPROXIMATELY 70 DRUMS OF BELIEVED TO BE SOLVENTS DUE TO THE ODOIR EMINATING FROM THE DRUM AREA. THREE SAMPLES WERE COLLECTED FROM THREE DRUMS ON AUGUST 7, 1985, WITH THOSE RESULTS NOT YET COMPLETE. THESE DRUMS OCCUPY AN AREA OF APPROXIMATELY 25 X 40 FEET AND ARE LOCATED IN THE SOUTH-CENTRAL PORTION OF THE SITE. THE REMAINDER OF THE SITE CONSISTS OF THOUSANDS OF TIRES AND MISCELLANEOUS DEBRIS.

THE LOCATION OF THE SITE IS VERY REMOTE FROM RESIDENCES AND ANY KIND OF TRAFFIC. FARM LAND COMPLETELY SURROUNDS THE SITE WITH THE NEAREST RESIDENCE BEING THE OWNER OF THE PROPERTY LOCATED ABOUT 1/4 MILE TO THE SOUTH.

AT THIS TIME, I FEEL THAT THIS SITE IS NOT AN IMMEDIATE RISK TO HUMAN LIFE OR HEALTH OR TO THE ENVIRONMENT. THEREFORE, THIS SITE SHOULD NOT BE
